Career Objective

My main focus as of now is to become a good full-stack developer and to build full-scale applications using MERN stack. And learning the MERN stack effectively by doing projects.

Skills

- React
- NodeJS
- Database
- Python

Projects

Laundry management system using PHP and MySQL

A website made for Laundry management using PHP and MySQL where admin can manage all the data of their customers.

Weather app using ReactJS and openweathermap API

A weather app built using React which shows the weather infomation of searched place with the help of weather API.

Socket chat app using ReactJS and Node using socket.io

A chat app built using Socket.io library which enables low latency,bidirectional event based communication between a client and server.

Expense tracker using ReactJS

A simple expense tracker app built using React which allows user to store their daily expenses.

Agricultural e-commerce app using MERN stack

An agricultural e-commerce app where the small community can sell their goods to large commnunity. This project is in development stage.

Education

2019- present Engineering in Computer Science	**SDM Institute of Technology, Ujire (D.K.)** 8.46 CGPA (till 5th sem)
2017-2019 Pre University	**Poorna Prajna science pu college, Ankola (U.K.)** 86.66%
2015-2017 SSLC	**P.M. High school, Ankola (U.K.)** 84.64%

Certifications

ReactJS (Basic) by HackerRank

Node (Basic) by HackerRank

SQL (Basic and intermediate) by HackerRank

Python (Basic) by HackerRank
